

REVIEWER ACKNOWLEDGEMENT

Open Access

# Thanks to all those who reviewed for *Reproductive Health* in 2015

José M. Belizán<sup>1\*</sup>, Sunni Mumford<sup>2</sup> and João Paulo Souza<sup>3</sup>

## Contributing reviewers

Those devoted to medical science have, as their main purpose, the ambition to improve the quality of life of the population. The editorial team of *Reproductive Health* is mainly devoted to improving reproductive health, particularly for those populations with major needs.

A peer-reviewed journal would not survive without the generous time and insightful comments of the reviewers, whose efforts often go unrecognized. They provide their valuable time without receiving any personal profit to guarantee the quality of research findings. A clear demonstration of generosity, the foundations science was built upon. Final editorial decisions are greatly facilitated by the deeper technical knowledge, scientific insights, understanding of social consequences, and passion that reviewers bring to our deliberations. For these reasons, the Editors-in-Chief and staff of *Reproductive Health* warmly thank the reviewers of 2015 whose comments helped to shape the journal, for their invaluable assistance with review of manuscripts in Volume 12 (2015).
